

Spray Tanning tips for pre and post care.

-The day before your tan we suggest you exfoliate and shave, that will allow your skin to shed a little overnight, so the tan has something to adhere to.

-When coming to the salon do not apply moisturiser and deodorant and wear something dark and loose. Deodorants with aluminum in them will turn the tan green under your arms.

-After your tan is done best off not to wear a bra if possible.

-Our tans are rapid tans and what that means is that although you can rinse off in as little as 2 hours the tan keeps developing for 24 hours. So, in that 24-hour period no soap or moisturisers are to be used.

-We like to tell clients not to use soap or moisturiser for 2 showers then you can go back to your normal routine.

-Before hopping out of the shower make sure the tan residue hasn't left any streaking, if so just keep rinsing till the streaking is gone.

Tip... to keep your tan even longer, a Tan Extender is recommended.
